

Bryan HOUNANG

Seeking a 4–5 Month Internship

Passionate about information technology and emerging technologies, I aim to build a professional career in information systems and digital technologies. Through this internship, I want to strengthen my technical skills, gain practical experience, and actively contribute to the projects and growth of your company.

🏠 18 Allée François Mitterrand, 49100 Angers 📄 Permis B

Professional Experience

● Network Technician Intern

INFOGENIE TECHNOLOGIES

06/2024 – 08/2024

Yaoundé, CE, Cameroon

- Assisted in the deployment and installation of routers and network equipment.
- Configured network devices (IP addressing, connectivity testing, network validation).
- Diagnosed connectivity issues and verified network configurations.
- Performed network tests (ping, Internet and LAN access validation).
- Verified proper operation of installations after deployment.

● Academic & Personal Projects

ESEO

09/2025 – 04/2026

Angers

Data Science & AI:

- Processed large datasets using Python, Pandas, NumPy, and Matplotlib.
- Automated data extraction (web scraping) and data cleaning for predictive analysis.

Networks, Systems & Cloud Infrastructure:

- Configured Cisco network architectures (static/dynamic routing, VLANs, ACLs).
- Administered Linux (Debian) systems, SSH/FTP services, and Apache2 web servers.
- Designed relational databases and managed SQL using phpMyAdmin.
- Optimized queries and administered local database servers.

Software Development & Java (OOP):

- Developed a School Management System using Java JDK 17.
- Applied Object-Oriented Programming concepts: encapsulation, inheritance, and polymorphism.
- Optimized data structures using Binary Search Trees (BST) and recursive algorithms.
